Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Linear Algebra, Numerical Computing, Data Structures and Algorithms, Operating Systems, Computer Networks, Software Engineering, Artificial Intelligence, Web Engineering, Software Engineering

Projects

ChatApplication

- Created an Chat Application using Nodejs expressjs and socket.io in which multiple user can chat each other from differentsystem users can also create rooms for private chat .
- <https://github.com/balochbilawal/CHAT-APPLICATION>

Shopping Cart

- A shopping cart where user can add to cart items and remove the items from the cart. for the items I have used API that fetch the Product Data
- User friendly UI build with REACTJS and responsive for All screens
<https://shoppingcart22.netlify.app/>

Portfolio website

- Developed a responsive portfolio website using REACTJS and CSS5 having project section ,About section ,skills section, contact section and having interactive animations in the project.
- I have used Redux toolkit for state management
<https://myportfolio00021.netlify.app/>

Career Recommendation system

- Developed career recommendation system using LLM called Random Forest classifier (scikit-learn).
- Here I have some data in which I have trained LLM user will give values according to that value my system will recommend career to him/her .
- <https://github.com/balochbilawal/Career-Recommendation-system->

Awards and Achievements

- **Certificate of Achievement on JavaScript from Udemy instructor : Jones Schmedtmann**
